PROFESSIONAL SUMMARY

Full Stack Developer and Computer Science student with experience in software development, backend development, and open-source contribution. Built production-level projects using JavaScript frameworks (Node.js, Express.js, React) with MongoDB — including a WhatsApp automation platform with 1,700+ GitHub forks, 300+ stars, and a 5,000-member community, plus a REST API platform that processed 100,000+ requests. Completed MERN stack training at Corvit Networks. Skilled in API integration, Git-based collaboration, and automation. Active in GDG, AWS User Group, and Google Developer Program.

TECHNICAL SKILLS

Languages: JavaScript (Intermediate), C++ (OOP & Data Structures), Python (Basic)

JavaScript Frameworks: Node.js, Express.js, React.js

Frontend: HTML5, CSS3, Responsive Web Design

Backend Development: REST API Design, API Integration, JWT Authentication, Automation Scripting

Databases: MongoDB, SQL (Basic)

Tools & Platforms: Git, GitHub, VS Code, Postman, Render, Vercel, npm, Baileys

AI Dev Tools: Claude Code, ChatGPT Codex, Gemini CLI, Cursor, GitHub Copilot, Kiro

PROFESSIONAL EXPERIENCE

MERN Stack Development Training Program | Corvit Networks, Lahore, Pakistan 2026 | 3 Months

- Built 3+ full-stack MERN applications from scratch to deployment using MongoDB, Express.js, React, and Node.js.
- Implemented JWT-based authentication systems including user registration, login, and session management.
- Integrated 5+ third-party REST APIs, connecting React frontends to Express/MongoDB backends.
- Developed reusable React components and collaborated via Git-based code reviews with team members.

Open Source Maintainer & Software Developer | Personal Projects | Open Source Contributions | University Groups 2023 – Present

- Authored and maintained 4+ personal open-source JavaScript projects covering automation, REST APIs, browser utilities, and data tooling.
- Contributed to external repositories via pull requests, bug reports, and code reviews.
- Led software development in 2+ university groups, coordinating Git workflows across 3–5 contributors.

PROJECTS & OPEN SOURCE

XLICON WhatsApp Bot | Open Source WhatsApp Automation Platform github.com/ahmmikun

Node.js | WhiskeySockets Baileys | MongoDB | REST API Integration

- Built a multi-device WhatsApp automation platform with 50+ commands — group admin, AI responses, event handling, and community moderation.
- Reached 300+ GitHub Stars and 1,700+ Forks; XLICON BOTZ WhatsApp community grew to 5,000+ members.
- Garnered 10,000–15,000+ project views and maintained the codebase across multiple release cycles with contributor onboarding and code reviews.

REST API Platform | Multi-Service Backend Development Project

Node.js | Express.js | MongoDB | React | EJS | HTML5 / CSS3

- Built a production REST API platform with 200+ endpoints across utility, downloader, search, and automation services — processing 100,000+ total requests.
- Integrated 10+ third-party services with Express.js routing and MongoDB storage; built a React/EJS documentation portal for external developers.

Keys Monitor | Browser-Based Keyboard Testing Tool

- JavaScript browser utility for real-time keyboard latency and key-chatter detection using event-driven DOM architecture.

Government Price Monitoring Tool | Public Data Automation Project

- Automated pipeline to scrape, parse, and normalize public government pricing datasets — reducing manual data entry by ~90%.

COMMUNITY LEADERSHIP

Founder & Open Source Maintainer — CodeNoSekai

2023 – Present

- Founded a developer community across WhatsApp, Discord, and GitHub, growing to ~200 active developers; shipped 2–3 community open-source projects.
- Managed Git repositories, pull request reviews, and contributor onboarding across all org projects.
- Personal GitHub account has accumulated 3,000+ stars across all repositories.

Active Community Member | GDG Lahore | AWS User Group | Google Developer Program

2023 – Present

- Google Developer Group (GDG) Lahore — attended 5+ developer events and technical workshops.
- Google Developer Program — enrolled member with access to Google developer tools and resources.
- AWS User Group — participated in cloud architecture sessions focused on backend development.
- Events: GitHub Copilot Dev Days, Kirothon Hackathon, GDG and AWS community meetups.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | Government Graduate Science College, Lahore, Pakistan

Expected 2028

4th Semester | Coursework: Data Structures, Object-Oriented Programming (C++), Programming Fundamentals

Intermediate in Computer Science (ICS) | Punjab College, Lahore, Pakistan

2023 – 2024

Grade A | 989 / 1200

CERTIFICATIONS & TRAINING

MERN Stack Web Development Training | Corvit Networks, Lahore, Pakistan

2026

Responsive Web Design Certification | freeCodeCamp

2023

Web Design Course | Udemy

2023
